SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Dear Sir:

As a preliminary matter, the instant Supplemental Information Disclosure Statement filing is further to an Information Disclosure Statement filed February 13, 2004 (the "2004 IDS"). The 2004 IDS was received by the US Patent Office on February 17, 2004 as indicated by the US Patent Office stamp on the self-addressed postcard filed with the 2004 IDS, a copy of which is included with this submission. On March 1, 2005 the Examiner informed us that he had not received the 2004 IDS. Subsequently, we have been able to determine that the 2004 IDS was filed with the parent application (USSN 10/125,068) and respectfully request that it be moved to the instant application.

As noted in the 2004 IDS, several references cited in the International Search Reports ("ISR") for related international application nos. PCT/CA94/00160 and PCT/CA96/00179 were previously cited and considered during prosecution. Certain references, however, were inadvertently not disclosed to the Examiner during the prosecution of US Patent Nos.

5,972,328; 5,840,294; 5,728,375; and 5,643,562 (the four U.S. patents issued from parent applications of the instant application). Specifically, with respect to the ISR for application no. PCT/CA94/00160 (reference G7 in the 2004 IDS), references A2, A13, A10, A12, A16, B1, C1, C2, C14, and E1 in the 2004 IDS were not previously disclosed. Likewise, with respect to the ISR for application no PCT/CA96/00179 (reference G10 in the 2004 IDS), references A15, D2, F8, F27, F28, G2, G4, G9, and G16 in the 2004 IDS were not disclosed.

Of these references inadvertently not disclosed, one of these references, WO 92/14456 (reference F28 in the 2004 IDS), was cited during the prosecution of Japanese Patent Application Hei 08-527140 (granted as Japanese Patent No. 3623236). Applicants provide for the Examiner's consideration, papers from the file history of this Japanese patent application, as well as other corresponding foreign applications. Specifically, Applicants disclose herewith examination reports and responses from the prosecution file history of corresponding foreign applications.:

- Australian Appln No. 50976/96 (Granted as Australian Patent No. 716,218): references J2– J5;
- Brazilian Appln No. PI9607197-4 (Pending): references J6– J8;
- European Appln No. 96 907 229.7 (Granted as European Patent No. 0814842): references J9– J19;
- Japanese Appln No. Hei 08-527140 (Granted as Japanese Patent No. 3623236): references J20– J23;
- Mexican Appln No. 976,986 (Granted as Mexican Patent No. 207318) : references J24– J28; and
- New Zealand Appln No. 303914 (Granted as New Zealand Patent No. 303914) : references J29– J32.

As indicated in the attached SB-08, English translations are also submitted where appropriate. These translations have been prepared by our local agents and are not official translations. There is also a further pending application in Canada, and we have filed divisional applications in Europe and Japan, but there has not yet been substantive prosecution in these applications.

The law relating to patentability varies widely from country to country and, accordingly, this disclosure is not to be interpreted as a representation that the cited publications, office actions, responses, allowances (where granted) and the like, are material

and/or applicable to the present application under United States law. Applicants understand that the Examiner will make an independent evaluation of these papers.

In the 2004 IDS, we disclosed and provided the full primary references corresponding to Chemical Abstracts cited in the ISR of related international application no. PCT/CA96/00179 (references A15, G16, D2 and C9 in the 2004 IDS). Applicants also provide, for the sake of completeness, the Chemical Abstracts (provided as references J33, J34, J35, J36).

Finally, Applicants also cite new references I1, I2, I3, and J1 which are listed in the attached SB-08.

This statement is not to be interpreted as a representation that the cited publications are material, that an exhaustive search has been conducted, or that no other relevant information exists. Nor shall the citation of any publication herein be construed *per se* as a representation that such publication is prior art. Moreover, Applicants understand that the Examiner will make an independent evaluation of the cited publications.

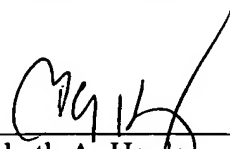

In accordance with 37 C.F.R. §1.97(b)(1), no additional costs are believed to be due in connection with the filing of this Information Disclosure Statement. However, please charge any necessary fees in connection with the enclosed Statement to our Deposit Order Account No. 12-0080, order number "NCI-003CN5," from which the undersigned is authorized to draw.

Respectfully submitted,

LAHIVE & COCKFIELD, LLP

Date: October 21, 2005
